

SPECIAL MEASUREMENTS TEST ROOM

ACTIVITIES:

- Measurement of temperatures, pressure, noise, acoustic power;
- Measurement of forces, path, acceleration;
- Tensometric acceleration;
- Tests of mechanical resistance, strength, reliability;
- Tests of PPE;
- Tests of seismic capability;
- Measurement of physical quantities;
- Tests of screw propellers.

Tests of running wheels of the track vehicles

Tests of mechanical resistance of measuring transformers

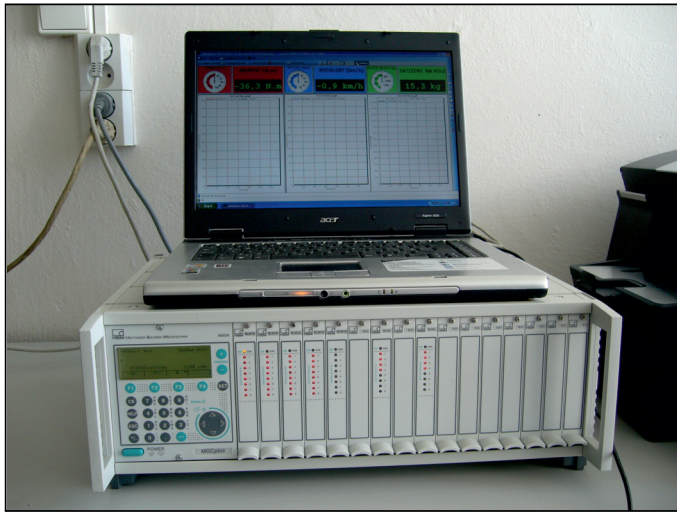

Mechanical resistance against the vibration and shocks - TIRAvib 57315 LS

Tests of security nets

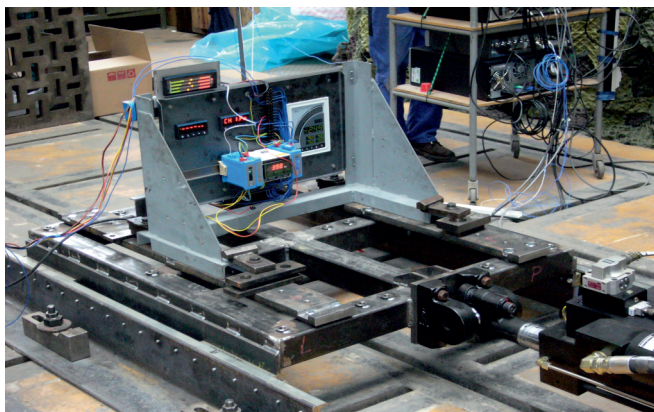

Technological equipment testing

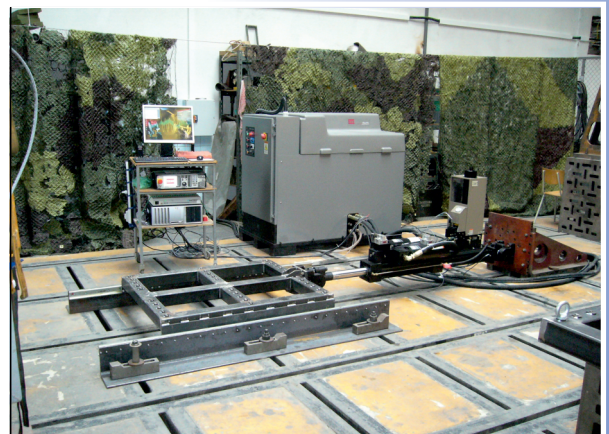

Physical quantities– 48 measuring places
- HBM MGCplus measuring unit

Vibrations affecting the human body
- Vibrometr B&K 2260 Observer

Tests of seismic capability of measuring systems

Seismic capability of nuclear power plants technologies - MTS seismic stand

Binding equipments and ropes
– loading stand for tensile tests

Tests of mechanical resistance of locomotive blocks
