Company Registration Number: 24272523

of quality system compliance as required by

ČOS 051672 (AQAP 2110)

Scope of validity:

The scope of validity is indicated on the reverse side of the certificate.

1. This Certificate is issued by DSCGQAA after quality system audit carried out from June 6th, 2023 to June 8th, 2023. The Authority is not responsible for quality system changes implemented by the contractor after this Certificate has been issued.
2. This Certificate is valid solely for verified scope of activities and must not be used for other scope of activities than for which it is issued.
3. The Authority is responsible neither for unauthorized use of the Certificate nor for damage which could be caused by both authorized or unauthorized use to a third party.
4. This Certificate does not replace quality guarantee and contractor's responsibility for flaws and damage resulting from generally accepted legal regulations nor does it replace official verification in accordance with other generally accepted regulations.

This Certificate is valid till: July 31st, 2026

As far as foodstuff suppliers are concerned, the title to avail of this certificate is subject to continuous observance of hygienic norms and recommendation for supplying the Armed Forces of the Czech Republic with foodstuff that is issued as a part of Protocol of an inspecting authority on behalf of the Military Veterinary Service.

In Prague on: July 12th, 2023

Martin Dvořák
Director DSCGQAA

Scope of validity:

- Management, supervision and implementation of research, development, production, service, maintenance, testing, consultancy, training, expert and verification activities applied mainly in the systems and technologies of the Air Force and Air Defence of the Army of the Czech Republic, other armed forces and the integrated rescue system of the Czech Republic.
- Production, maintenance and repair of aircraft ground equipment and military aircraft equipment.
- Maintenance, repair, construction and modification of airplanes and helicopters, including UAVs (unmanned aerial vehicles), including their systems and parts.
- Training of aviation ground personnel including UAV operators.
- Development, testing, consultancy and application of software (application software equipment, control systems and information systems).
- Design, development, repair, renovation, modernization, service and testing of combat, other vehicles and material.
- Development, production and assembly of car superstructures, trailers, semi-trailers and containers.
- Design, development and production, service and testing of military equipment and engineering materials and products for civilian use.
- Design, development and production, service and testing of weapons, reconnaissance and ammunition systems of ground military equipment.
- Production, testing, delaboration, revision, life extension and ecological disposal of ammunition and ammunition elements.
